EDUCATION

Sep 2023 – Jul 2027	Bachelor of Engineering in Artificial Intelligence and Machine Learning Vemana Institute of Technology — CGPA: 8.92	Bengaluru
Aug 2021 – Apr 2023	Crescent Composite PU College 2nd PUC — Percentage: 88%	Bengaluru

TECHNICAL SKILLS

Programming	Python, Java, C, SQL
Machine Learning	Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering
Artificial Intelligence	Generative AI, Prompt Engineering
Data Analytics	Pandas, NumPy, Power BI, Data Cleaning, Data Visualization
Computer Vision	OpenCV, MediaPipe
Database	MongoDB, MySQL
Tools	Git, GitHub, VS Code

SOFT SKILLS

Communication • Teamwork • Problem Solving • Adaptability • Time Management • Leadership

COURSES & CERTIFICATIONS

- Gen AI for IT Professionals – Udemy
- Explore Machine Learning using Python – Infosys Springboard
- Data Analytics with Python – Innomatics Research Lab
- Ethical Hacking – NPTEL
- Prompt Engineering – Infosys Springboard
- Web Development – SkillForge

ACADEMIC PROJECTS

Aug 2025 – May 2026	AI Resume Screener Developed an AI-powered resume screening system to automate resume analysis and candidate evaluation. Implemented job-role prediction, resume-job compatibility scoring, and relevant skill extraction from resume content. Added automated interview-question generation based on the candidate's resume and identified skills.
2026	Conversational Chatbot with Gen AI Capabilities Developing a conversational AI chatbot in collaboration with Proptelligence, integrating Generative AI capabilities to provide context-aware responses and natural language interaction. Working on conversation handling, prompt-based responses, and AI-driven query processing to improve user interaction and response quality.

PERSONAL PROJECTS

2026

Intelligent Form Automation Agent

Developed an AI-powered browser extension that automates Google Forms and Microsoft Forms using user-provided profile information. Built an end-to-end system using a browser extension, FastAPI backend, and SQLite database, with intelligent question-to-field mapping and controlled autofill to improve accuracy and reduce repetitive manual data entry.

2026

Hand Gesture Controlled Document Viewer

Developed an interactive Document/PDF reader controlled through hand gestures using computer vision. Implemented real-time hand tracking and gesture recognition with MediaPipe and OpenCV, enabling hands-free actions such as page navigation and PDF interaction through camera-based gestures. Integrated a web-based PDF viewer with a Python backend for gesture processing.
